PFISTERER

Shielding Set for P3EC2 Elbow Connector, two-core

suitable for all coding types.

This shielding kit is used to connect shielded cables on half Shells together with the plug angled cord entry P3EC2 from the PLUG Connection system, and it is used for types of cables with revertable copper mesh braid.

Technical Features Heat Shrink:

- Flammability: Self extinguishing
- Dielectrical strength: 11 kV/mm
- Operating temperature range: -55 bis +130°C
- Characteristics:
  UV-constant
  Halogen free
  Resistent against chemical factors

A shielding kit is a modular collection of various components for connecting the shielding of a cable to the half shells around a PLUG elbow connector. Consequently, every parts list for a shielding kit is configured to a corresponding application, thus enabling targeted use and Optimum Adaptation to customer requirements and the specific cable.

The shielding kit is suitable both for indoor as well as outdoor use.

A shielding kit can only be configured for cables with braided shield.
