Cable Distribution Cabinet 325, Size 00

Design:
The model range 325 combines the benefits of an 1100 mm high cable distribution cabinet from model range 310 and a matching base in one product.
The cabinet cannot be removed from the base as the two parts are joined by end-to-end side panels. This means that the installation width is not restricted in the lower section of the cabinet, as is normally the case. The installation height of 1200 mm can therefore be used across the full width of the cabinet.

Technical description:

- Degree of protection IP 44
- UV protection available on request as a coating for the roof or the entire cabinet

Picture may vary.

Technical Data

Article no.	**546 800 202**
Locking system	**Lock for 2 profile half cylinders**
Surface	**corrugated**
Application	**Pillar with swing-door**
