

Contact Grease Compound P1, Can, 25 kg

PFISTERER Contact Grease Compound P1 permanently protects Al/Al, Cu/Cu and Al/Cu bolted connections on outdoor and indoor installations against corrosion. Together with its high temperature resistance (-35 °C bis 160 °C) a reliable transmission of continuous current is guaranteed. Contact Grease Compound P1 has good adhesive properties, **is non-conductive**, resistant to water as well as to an atmosphere containing steam, SO₂/SO₃, sodium chloride, nitrous gases, chlorine and ozone.
