

Twin Spacer Damper

Features

- maintains the design spacing between subconductors under normal service conditions
- controls the levels of aeolian vibration and subspan oscillation within the internationally accepted safety limits
- preserves mechanical elastic and damping properties over the entire service temperature range and for the expected lifetime of the line
- is maintenance-free for the whole lifetime of the line
- permits movement of the subconductors in any direction without damages of spacer components and subconductors strands
- maintains a suitable clamp grip and prevent clamp loosening by means of a safety plate and a belleville washer
- guarantees high corona extinction voltage due to proper clamp design and manufacturing
- withstand minimum short circuit current of 63 kA for 1 second

Picture may vary.

Materials

- Body and clamps:
high pressure die cast aluminium alloy
- Rubber elements:
elastomer
- Locking latch:
stainless steel

Technical Data

| | | |
|-----------------------------------|--------------------|-------------|
| Article no. | 186 954 268 | |
| Bundle Quantity | 2 | |
| Bundle Spacing S | (mm) | 500 |
| Conductor diameter range A | Ø (mm) | 34.5 - 35.0 |
| Clamp type | Nut Cracker Clamp | |
