

Manual compression tool PRIMAT 02

Mechanical, open design.

The open design of the compression head enables the compression tool to be put on and taken off the connection to be compressed without removing the dies.

Compressible cross sections:

Copper up to 35 mm²

Aluminium up to 50 mm²

Accessories:

- Case for mechanical hand compression tool, PRIMAT 02 and dies
- Holder for mechanical hand compression tool, PRIMAT 02 for clamping the tool into a vice

Picture may vary.
