

## Electro-hydraulic high-pressure pump AP5

The new battery-powered high-pressure pump AP5 makes it more easy to produce reliable crimp connections. The unit features a high-power rechargeable battery which enables its use in any location and guarantees a large number of crimping operations. It is also equipped with a remote control on the hydraulic hose which actuates the crimping operation directly on the compression head and can interrupt the crimping operation at any time, if required. When maximum pressure is reached, the compression head retracts automatically, and an LED indicates successful completion of the crimping operation. The coupling bush features non-drip coupling and decoupling. The high-pressure pump AP5 is extremely sturdy, is designed for a long service life in harsh work environments and is suitable for all PFISTERER compression heads.

*Picture may vary.*

### Advantages:

- Battery-supplied
- Large number of crimping operations
- Remote control of the pump on the hydraulic hose
- Sturdy and durable
- LED battery charge indicator
- LED crimping pressure indicator

### Scope of delivery:

- Battery-powered high-pressure pump
- High-pressure hose set with handle, length 3 m. Other lengths on request
- Lithium ion battery 36 V / 2.6 Ah
- Battery charger Makita DC36RA

### Suitable tools:

All PFISTERER cutting and compression heads designed for a crimping pressure of 850 bar, e.g.

- Hydraulic compression heads O6, GO6, GO6-300
- Compression head B III
- Compression heads size III, IV and VI

## Technical Data

Article no.	305 940 001	
Operating pressure	(bar)	850
Hose length	(mm)	3000
Weight	(kg)	11,5

Article no.		305 940 001
Battery capacity	(Ah)	2,6
Battery voltage	(V)	36
Battery type		Lithium ion
Operating temperature		-20°C bis +40
Max. operating pressure	(bar)	850
Line voltage	(V AC)	230 V / 50 Hz AC
