

One-Core Cold-Shrink Hybrid Joint, 12/24 kV, 185-400 mm², without Bolted Connector

for XLPE cable with copper wire screen.

Material:

- durable silicone rubber

Advantages:

- Reliable contacting of all conductors
- Optimum contact force for all conductors
- No damage to individual conductors
- Mounting with standard tools
- Excellent insulation
- Wide range of application
- Tested according to HD 629

Scope of delivery:

- Cold shrink body with integrated electrodes for field control
- Screen connection components
- Heat shrink outer tubes
- Cleaning wipes, sanding paper, grease, etc.

Attention:

The bolted connector is **not** included in the scope of delivery and has to be ordered separately.

Picture may vary.

Technical Data

Article no.	332 730 103
Designation	PCHJ 12-24/185-400-1
Cable cross section at 12 kV	(mm ²) 240 - 400
Cable cross section at 24 kV	(mm ²) 185 - 400
Insulation diameter min.	(mm) 25.3
Insulation diameter max.	(mm) 40.0
Recommended bolted connector	332 617 012
Bolted connector included	no
