

One-Core Cold-Shrink Hybrid Joint, 36/42 kV, 50-240 mm², without Bolted Connector

for XLPE cable with copper wire screen.

Material:

- durable silicone rubber

Advantages:

- Reliable contacting of all conductors
- Optimum contact force for all conductors
- No damage to individual conductors
- Mounting with standard tools
- Excellent insulation
- Wide range of application
- Tested according to HD 629

Scope of delivery:

- Cold shrink body with integrated electrodes for field control
- Screen connection components
- Heat shrink outer tubes
- Cleaning wipes, sanding paper, grease, etc.

Attention:

The bolted connector is **not** included in the scope of delivery and has to be ordered separately.

Picture may vary.

Technical Data

Article no.	332 730 301
Designation	PCHJ 36-42/70-240-1
Cable cross section at 36 kV	(mm ²) 95 - 240
Cable cross section at 42 kV	(mm ²) 70 - 240
Insulation diameter min.	(mm) 26.8
Insulation diameter max.	(mm) 40.0
Recommended bolted connector	332 592 012
Bolted connector included	no
