

One-Core Cold-Shrink Hybrid Joint, 36/42 kV, 400-630 mm², without Bolted Connector

for XLPE cable with copper wire screen.

Material:

- durable silicone rubber

Advantages:

- Reliable contacting of all conductors
- Optimum contact force for all conductors
- No damage to individual conductors
- Mounting with standard tools
- Excellent insulation
- Wide range of application
- Tested according to HD 629

Scope of delivery:

- Cold shrink body with integrated electrodes for field control
- Screen connection components
- Heat shrink outer tubes
- Cleaning wipes, sanding paper, grease, etc.

Picture may vary.

Attention:

The bolted connector is **not** included in the scope of delivery and has to be ordered separately.

Technical Data

Article no.	332 730 304	
Designation	PCHJ 36-42/300-630-1	
Cable cross section at 36 kV	(mm ²)	300 - 630
Cable cross section at 42 kV	(mm ²)	300 - 630
Insulation diameter min.	(mm)	35.1
Insulation diameter max.	(mm)	51.0
Recommended bolted connector	332 603 012	
Bolted connector included	no
