

# 2DIREKT XL Ball Pin D25

PFISTERER offers special ball fixed points for 2DIREKT transformer terminal clamps for attaching earthing and short-circuiting devices.

The ball fixed point is suitable for all 2DIREKT XL clamps with a conductor cross section range of 185 – 400 mm<sup>2</sup>. The 2DIREKT XL ball fixed point has no pressure plate and therefore cannot be used for contacting a conductor. The assembly is only permitted in a free conductor channel without spacer.

This version is suitable for uncovered and covered applications - provided that an appropriate cover with earthing possibility is available.

The ball fixed points correspond in their dimensioning to DIN 48088 Part 1.
