

Telescoping earthing pole, 2-piece

Earthing pole for railway systems, in two-part design. This earthing pole is used mainly for transformers and railway power lines and is continuously adjustable.

Technical description:

- Operating head for receiving contact wire earthing terminals held by spindle and cross-pin.
- Operating head with roller locking device allows the earthing pole to be easily attached / detached from the conductor phase clamp.

Picture may vary.

Technical Data

Article no.	362 744 001
Application	two-part
Length range	(m) 1,8 - 3,5
Material	Fibreglass reinforced polyester

Dimensions

Total length	L₀ (mm)	3550
Transporting length	(mm)	1870
Insulating length	L₁ (mm)	500
