

Telescoping earthing pole, 2-piece

Earthing poles for railway systems, in two-piece design. The upper section of this earthing pole is continuously adjustable. A slider enables the connection between the earthing pole and the contact wire earthing terminal to be locked. The earthing pole can thus be used to mark the work site.

Technical description:

- Aluminium operating head for contact wire earthing terminals held by spindle and cross-pin.
- Operating head with roller locking device allows the earthing pole to be easily attached / detached from the contact wire earthing terminal.
- Robust construction for use in Railway applications.

Technical Data

Article no.	362 744 744	
Application	two-part	
Length range	(m)	2,6 - 5,0
Material	Fibreglass reinforced polyester	

Dimensions

Total length	L ₀ (mm)	5000
Transporting length	(mm)	2660
Insulating length	L ₁ (mm)	500
