

Earthing pole, five-pieces

Earthing pole for railway systems in five-piece design. Because of the short carrying length, this type is suitable for transport in all common passenger vehicle types. The earthing pole can be secured against unintentional loosening by interlocking with the contact wire earthing clamp and can thus be used as a highly visible marker of the work site.

Picture may vary.

Technical Data

Article no.	364 784 003	
Application	five-piece, pluggable	
Length range	(m)	4,9
Material	Fibreglass reinforced polyester	

Dimensions

Total length	L _G (mm)	4892
Transporting length	(mm)	1100
Insulating length	L _I (mm)	500
