

Cable Distribution Cabinet 224, Size 0

Design:

The model range 224 combines the benefits of an 1100 mm high cable distribution cabinet from model range 204 and a matching base in one product.

The cabinet cannot be removed from the base as the two parts are joined by end-to-end side panels. This means that the installation width is not restricted in the lower section of the cabinet, as is normally the case. The installation height of 1200 mm can therefore be used across the full width of the cabinet.

Technical description:

- Degree of protection IP 44
- UV protection available on request as a coating for the roof or the entire cabinet

Picture may vary.

Technical Data

Article no.	546 700 202
Locking system	Lock for 2 profile half cylinders
Surface	corrugated
Application	Pillar with swing-door
