

Tilting Operating Pole, one-piece with Operating Head

Earthing poles consist of handle, insulating part, black ring and mounting head. The length of the insulation part has to be at least 500 mm. The tilting operating head facilitates the installation of an earthing and short-circuiting device for CONNEX device connection parts at different heights.

Technical description:

- Earthing pole with tilting operating head
- Earthing pole of glas fiber reinforced polyester tube in yellow colour
- The black mark identifies the necessary safety distance

Picture may vary.
