

CONNEX Grounding and Current Testing Connector, Size 2, $I_n = 800 \text{ A}$, $U_{\max} = 2 \text{ kV}$, outdoor-resistant

This connector permits to carry out current tests on switchgears, transformers, transducers etc. fitted with CONNEX sockets.

For the electrical and mechanical connection, the connector is inserted into a CONNEX socket of equal size and bolted. The test lead is connected to the terminal stud with a screw.

Picture may vary.

Technical Data

Article no.	827 181 012	
Size	2	
Working place	indoor, outdoor and offshore in protected areas	
Environment temperature	(°C)	-25°C up to 50°C
Max. testing voltage	U_m (kV)	2
Nominal current	I_N (A)	800
Connection thread	1 x M12	
Weight	(kg)	1,3

Dimensions

Length outside socket	(mm)	45
Pitch circle diameter	(mm)	102
