

CONNEX T-Joint, size 1 up to 36 kV, soilproof

Single-pole, metal clad, for outdoor use, soil resistant.

Using this T-joint and the CONNEX coupling connector, switching stations that are equipped with CONNEX-bushings can later be expanded to become double connections. In addition, a plug-in cable branch wire can also be realised.

The single-pole T-joint is provided wired ready for connection. The CONNEX contact bushings are integrated in the soil-resistant insulating bodies.

The connection is established by inserting the CONNEX separable connector.
Cast shieldings additionally guarantee a short-circuit-resistant cable shielding connection.
In the event of network modifications, the underground T-joints can be replaced by CONNEX cable joints.
