

Voltage detector KP-Test 5R+ DC

The KP-Test 5R+ DC is a two-pole voltage detector for use on contact linesystems of DC railways. The hook electrode simply hooks onto catenary lines or contact wires, while the handy magnetic contact forms a simple earthing connection via the rail.

Technical description:

- Double signalling
- Integrated audible signal
- Extremely bright LEDs
- Maximum resistance to interference fields
- Self-test at switch-on
- Can be used in rain and snow
- Induced AC voltage signal detection
- Magnetic contact for the rail included in the scope of delivery
- Voltage testing possible even with a high proportion of leakage current on disconnected contact wires
- Cable length 6.5 m

Picture may vary.

Technical Data

Article no.	930 350 002 00007	
Quantity of insulating poles	2	
Nominal Voltage DC	U_n (V)	3000
Suitable bag	B3, B22	
Voltage type	DC	
Area of application	Catenary Wires	
Language on labels	de	
Type	KP-Test 5R+ DC	

Dimensions

Total length	L_G (mm)	5020
Length of handle	L_H (mm)	1120
Insulating length	L_I (mm)	2997
Transporting length	L_T (mm)	2400
